## PREFACE

This book is intended to encourage an understanding and appreciation of Elective Mathematics at the Senior High School level in West Africa. Providing appropriate solutions to examination problems is of particular importance in the study of mathematics. As a mathematics lecturer, the author has discovered the weaknesses and shortcomings of students in the handling of examination questions. Subsequently, to guide students in answering typical questions in Elective Mathematics as set out in recent examinations, the writer has paid particular attention to those areas of the syllabus, which many students find difficult.

A prominent feature of this book is the inclusion of many examples. Each example is carefully selected to illustrate the application of a particular mathematical technique and or interpretation of results. Another feature is that each chapter has an extensive collection of exercises. It is important that students have several exercises to practice.

This book is therefore designed to help students to:

- (1) acquire the basic skills and understanding which is vital to examination success.
- (2) appreciate the use of mathematics as a tool for analysis and effective thinking.
- (3) discover order, patterns and relations.
- (4) communicate their thoughts through symbolic expressions and graphs.
- (5) develop mathematical abilities useful in commerce, industry and public service.

I have gone to great lengths to make this text both pedagogically sound and error-free. If you have any suggestions, or find potential errors, please contact the writer at [akrongh@yahoo.com](mailto:akrongh@yahoo.com).

**C. A. Hesse**

August, 2009

## **ACKNOWLEDGEMENT**

First and foremost, I express my sincere thanks to the Almighty God both for the gift of writing he has endowed me with and for the endurance to complete this particular book.

I am also grateful to Prof. A. Y. Jackson (Professor of Statistics) of Methodist University College Ghana, for reading a draft of the book and offering helpful comments and suggestions.

I am also indebted to Nana Owusu Mensah Essel who assisted me greatly by spending much time in editing every single chapter of this book.

The publication of this book could not continue without the advice and persistent encouragement of Mr. Carl Kotei, Head of Mathematics Department, Presec-Legon.

I would like to thank Mr. Salifu Addo and Mr. Adolf Hansen for reading through some parts of the draft of this book and for making valuable suggestions for its improvement.

Finally, my sincere gratitude goes to Mr. Fred Armah Hesse (Hesse Armah Chartered Accountants) and Mr. Ludwig Hesse (Department of Urban Roads, Accra) for their moral support, encouragement and for providing professional guidelines.

## CONTENTS

<b>1.</b>	<b>Sets.....</b>	<b>001</b>
1.1	Introduction .....	001
1.1	Operations on set.....	006
1.2	Three-set problems.....	012
<b>2.</b>	<b>Surds.....</b>	<b>023</b>
2.1	Addition, subtraction and multiplication of surds .....	023
2.2	Rationalization of the denominator .....	028
2.3	Equal surds .....	031
2.4	Surd equations.....	032
<b>3.</b>	<b>Binary Operations.....</b>	<b>036</b>
3.1	Introduction .....	036
3.2	Closure .....	037
3.3	Properties of binary operation .....	038
3.4	Identity and inverse elements.....	047
<b>4.</b>	<b>Relations and Functions .....</b>	<b>056</b>
4.1	Relations.....	056
4.2	Mapping .....	059
4.3	Functions.....	064
4.4	Largest possible domain of a function.....	073
4.5	Range of a function .....	076
4.4	Inverse of a function.....	079
4.5	Composite Functions.....	082
<b>5.</b>	<b>Quadratic Functions .....</b>	<b>092</b>
5.1	Quadratic functions .....	092
5.2	Maximum and minimum values and points of the quadratic function.....	092
5.3	Sketching curves of quadratic functions .....	095
5.4	Solving quadratic equations .....	096
5.5	Quadratic inequalities.....	099

5.6	Roots of quadratic equations.....	102
5.7	Symmetric properties of quadratic equations .....	105
5.8	Simultaneous equations in two variables, one linear and one quadratic .....	110
6.	<b>Polynomial Functions .....</b>	<b>114</b>
6.1	Definition of polynomial functions .....	114
6.2	Cubic functions.....	114
6.3	Algebra of polynomials .....	116
6.4	The remainder theorem.....	120
6.5	Factor theorem .....	121
7.	<b>Rational Functions .....</b>	<b>131</b>
7.1	Introduction .....	131
7.2	Operations on rational functions .....	132
7.3	Partial fractions .....	136
8.	<b>Indices and Logarithmic Functions.....</b>	<b>146</b>
8.1	Laws of indices.....	146
8.2	Equations involving indices .....	152
8.3	Laws of logarithms .....	159
8.4	Equations involving logarithms .....	166
8.5	Change of base.....	172
10.	<b>Experimental law .....</b>	<b>178</b>
10.	<b>Binomial Theorem.....</b>	<b>187</b>
10.1	Binomial Expansion .....	187
10.2	Combination method .....	194
10.3	Expansion and use of $(1 + x)^n$ to approximate exponential values .....	197
11.	<b>Linear Programming .....</b>	<b>205</b>
11.1	Linear inequalities in two variables.....	205
11.2	Linear programming .....	208

<b>12.</b>	<b>Coordinate Geometry (Straight Lines)</b> .....	<b>217</b>
12.1	Distance between two points .....	217
12.2	Midpoint of a line segment .....	218
12.3	Division of a line segment in a given ratio.....	218
12.4	Gradient of a straight line .....	221
12.5	Equation of a straight line .....	224
12.6	Intersection of lines .....	227
12.7	Parallel and perpendicular line.....	228
12.8	Acute angle between two intersecting lines.....	233
12.9	Area of a triangle.....	237
<b>13.</b>	<b>Coordinate Geometry (Circles)</b> .....	<b>243</b>
13.1	Equation of a circle .....	243
13.2	Finding the centre and radius given the equation of a circle .....	249
13.3	Tangent and normal to a circle .....	252
13.4	Loci .....	258
<b>14.</b>	<b>Parabola</b> .....	<b>265</b>
14.1	Equation of a parabola .....	265
14.2	Sketching a parabola.....	267
14.3	Tangent and normal to a parabola .....	271
<b>15.</b>	<b>Sequence and Series</b> .....	<b>274</b>
15.1	Linear sequence (Arithmetic progression).....	274
15.2	Geometric progression (exponential sequence) .....	285
15.3	Recurrent sequence.....	296
<b>16</b>	<b>Trigonometry</b> .....	<b>305</b>
16.1	Basic trigonometric ratios and their reciprocals.....	305
16.2	Angles in radians .....	313
16.3	Sine and Cosine rules .....	316
16.4	Application of sine and cosine rules to bearings .....	320
16.5	Compound and multiple angles .....	322
16.6	Graph of trigonometric functions.....	329
16.7	Solving trigonometric equations .....	337
16.8	Maximum and minimum points of trigonometric functions.....	341

<b>17. Statistics .....</b>	<b>347</b>
17.1 Frequency distribution .....	347
17.2 Graphical representation of data.....	351
17.3 Measures of central tendency.....	368
17.4 Quartiles, Percentiles and Deciles.....	384
17.5 Measures of dispersion .....	392
<b>18. Correlation.....</b>	<b>413</b>
18.1 The scatter diagram .....	413
18.2 Forms of correlation .....	414
18.3 Line of best fit .....	415
18.4 Spearman's rank correlation coefficient.....	422
<b>19. Probability .....</b>	<b>427</b>
19.1 Equally likely events .....	427
19.2 Mutually exclusive and independent events .....	436
19.3 Conditional probability .....	447
<b>20. Permutation and Combination .....</b>	<b>453</b>
20.1 Permutation .....	453
20.2 Circular Arrangement .....	458
20.3 Combination .....	460
<b>21. Probability 2 .....</b>	<b>470</b>
21.1 Application of combination .....	470
21.2 Binomial probability .....	476
<b>22. Matrices.....</b>	<b>480</b>
29.1 Idea of a matrix .....	480
29.2 Equal matrices .....	481
29.3 Addition and subtraction of matrices.....	482
29.4 Multiplication of matrices .....	485
29.5 Inverse of a $2 \times 2$ matrix .....	490
29.6 Linear Transformations .....	495

<b>23. Limits.....</b>	<b>522</b>
23.1 Limit of a function.....	522
23.2 Limits of trigonometric functions.....	528
<b>24. Differentiation .....</b>	<b>530</b>
24.1 Differentiation from first principles.....	530
24.2 Rules of differentiation .....	534
24.3 Differentiation of Implicit Functions.....	543
24.4 Differentiation of $\sin x$ and $\cos x$ .....	547
<b>25. Applications of Differentiation .....</b>	<b>553</b>
25.1 Equation of tangents and normals to a curve.....	553
25.2 Rates of change.....	558
25.3 Maxima and minima .....	565
25.4 Curve sketching.....	575
25.5 Linear kinematics.....	580
<b>26. Integration .....</b>	<b>587</b>
26.1 Indefinite integral.....	587
26.2 Definite integral.....	589
26.3 Integration by substitution .....	591
26.4 Integration of $\sin x$ and $\cos x$ .....	595
<b>27. Application of Integrations .....</b>	<b>601</b>
27.1 Kinematics .....	601
27.2 Areas under curves .....	606
27.3 Volume of revolution.....	614
27.4 The trapezium rule.....	620
27.5 Equation of a curve .....	624
27.6 Rates of change.....	627
<b>28. Vectors in a plane.....</b>	<b>633</b>
28.1 Representation of vectors in standard basis form.....	633
28.2 Resultant of vectors.....	634
28.3 Parallelogram and polygon laws of addition .....	636

28.4	Scale drawing and resolution of vectors.....	637
28.5	Properties of addition of vectors.....	646
28.6	Scalar multiple of a vector .....	647
28.7	Equal and parallel vectors.....	649
28.8	Position Vectors .....	652
28.9	Unit vectors .....	656
28.10	The dot or scalar product.....	657
28.11	The angle between the directions of two vectors .....	659
28.12	Applications of vectors to plane geometry .....	671
29.	Mechanics (Statics) .....	685
29.1	Scalar and vector quantities.....	685
29.2	Coplanar forces acting at a point.....	685
29.3	Equilibrium of particles.....	688
29.4	Moment of forces .....	698
30.	Mechanics (Dynamics) .....	708
30.1	Concepts of motion – Displacement, Velocity (Relative velocity) and Acceleration.....	708
30.2	Equations of motion .....	712
30.3	Newton's laws of motion .....	718
30.4	Momentum and impulse .....	727
30.5	Friction .....	743
30.6	Motion along inclined planes.....	747
30.7	Further applications of Newton's laws of motion .....	753
31.	Logic.....	762
31.1	Compound statements and converses of statements .....	762
31.2	Implication .....	764
31.3	The truth table.....	766
31.4	Derived truth table.....	767
31.5	Valid arguments .....	769
32	Objective Test.....	781
	Answers to Exercises.....	833
